Project Title:

Student Name:

Mentor Name:

Objective:

- What problem, question, or issue will your research or creative project address?

Background:

- What evidence or literature exists to support the research objective?
- Why is this an important problem or question to address?
- What experience do you have or what steps have you already taken to equip you to carry out this fellowship?

Methodology and Research Plan:

- Describe your intended plan of research and the specific steps you will take to carry out your research.
- What specific methods will you use for this project?
- What is the timeline of your project?

Outcomes & Impact

- What is the final form/deliverable of this project?
- What contribution will your project make to your field of study?
- How do you expect to share research findings?
- What external conference or grant opportunities will this fellowship help you pursue?

Budget:

- What expenses do you anticipate for your project, and why?

Proposals are judged on the following criteria:

- The proposal is complete, clear, and well thought out.
- The project has a high likelihood of making a scholarly contribution to the proposed discipline or student's academic growth.
- The proposal outlines an achievable project with a realistic timeline.
- The budget is reasonable and realistic for the proposed project.
